## Work Experience

---

### 11.2021 – Present:

#### Data Market, Istanbul, Turkey

- **Digital Solutions Specialist**

The main products that Data Market is developing are enterprise content management solutions (Hyland OnBase), robotic process automation (Hyland RPA), corporate identity management (ideal), industrial IoT (connected and smart), employee interaction mobile app (Mobil Yaka).

As a member of the Digital Solutions team, I am responsible for designing and developing applications for PoC and the production environment. Moreover, I do live demos of our products with our sales team to the customers, weekly online webinars, document my work, prioritize roadmap tasks and keep myself up-to-date with recent technology to extend our software portfolio.

#### **Project: Automation of Document Processing with RPA**

One of our customers asked us to automate their routine service-bureau operation in which they scan the documents, index several fields and cross-check those fields in the SAP system. Within 2 days, I designed a robot in Hyland RPA to fully automate this process. The whole story about this project can be found in the "Projects" section of [my portfolio](#).

### 02.2014 – 08.2018:

#### DDI Teknoloji ve Bilişim Çözümleri, Istanbul, Turkey

- **Kofax Technical Solution Specialist / 4 years**

(Kofax produces applications software that provides information capture, process management, data integration, customer communications management and analytics.)

Designing new forms and validation user interfaces with Kofax Capture and Transformation (C# and VB.Net used in background processes), analyzing customer's document types for new projects, revision and redesign of existing projects, workflow design for service bureau operations, integration of Capture software to customer's business applications (Pega, SAP, OpenText, MSSQL etc.), invoice and cheque automation.

#### **Project: Implementing Kofax Capture and Transformation for Türkiye İş Bankası**

İş Bankası processes EFT, remittance and arbitration commission documents that are either scanned/faxed or imported from an existing workflow (Pega) to Kofax with a volume of approximately 5000 cases per day. My job here was to design an automatic classification, separation and extraction of documents and to implement in the Bank's business application, Pega or NAR, depending on the case. I have also designed & programmed data validation user interfaces for these projects.

Other projects for Türkiye İş Bankası: Banking Service Agreements Automation, Cheque Automation, Robotic Process Automation, various invoice processing projects.

**11.2011 – 03.2013:**

**Birikim Otomasyon Sistemleri, Istanbul, Turkey**

- **Assistant System Administrator & Service Bureau Operations Manager**

Coordination and quality control of service bureau operations by managing data entry staff; fixing program errors through MSSQL and OS; preparing scheduled performance reports with MSSQL; maintaining and configuring document scanners and computers; introduction of new forms to the system.

## **Educational Background**

---

**2018 – 2020** Master of Applied Computer Science, Kristiania University College, Oslo, Norway (Masters)

**Master Thesis:** I developed an educational virtual reality application to measure student motivation and cybersickness. My main objective was to design an application that the students can enjoy, use easily and comfortably while keeping the development process of the VR software rapid and economical.

**Courses:** Big Data, IoT, Mobile Computing, Systems Development, Visual Analytics, Integration Oriented Architecture, Consulting and Leadership.

**2012 – 2016** Business Administration, Eskisehir Anadolu University, Eskisehir, Turkey (Bachelor's Degree)

**2009 – 2012** Computer Programming, Kocaeli University, Kocaeli, Turkey (Associate's Degree)

## **Skills & Certificates**

---

- **Programming Languages**

React	Good	Microsoft .NET C#	Basic
JavaScript	Good	Python	Basic
MSSQL	Good		

- **Certificates & Training**

- OutSystems Associate Reactive Developer
- Kofax Technical Solution Specialist Certificates for Kofax Capture, Kofax Transformation Modules, Kofax TotalAgility, Kofax Kapow and Kofax Express
- Microsoft Software and Database Programming (by GFN & Bahçeşehir University Wissen Akademie)
- A2 Level Norwegian
