Work Experience

11.2021 – 06.2025:

Data Market, Istanbul, Türkiye

Data Market develops enterprise content management solutions (Hyland OnBase), robotic process automation (Hyland RPA), corporate identity management, and employee interaction mobile applications.

- **Software Development Specialist, 01.2024 - 06.2025**

I joined the R&D team as a software developer, focusing on generative AI technologies and frontend development for our new generative AI software. Using React, Redux Toolkit, and TypeScript, I design and implement the application while continuously researching advancements in the field.

More details about this project are available in the "Projects" section of [my portfolio](.).

- **Digital Solutions Specialist, 11.2021 - 12.2023**

As a member of the Digital Solutions team, I designed and developed applications for PoC and production environments. I collaborated with the sales team to deliver live product demos, conducted weekly online webinars, created and maintained the whole product documentation.

02.2014 – 08.2018:

DDI Teknoloji, Istanbul, Türkiye

- **Kofax Technical Solution Specialist**

Kofax develops software for information capture, process management, data integration, customer communications management and analytics.

My role involved designing new forms and validation user interfaces with Kofax Capture and Transformation, revising and optimizing existing projects, and developing workflow solutions for service bureau operations. I also integrated Capture software with customers' ERP systems, automating invoice and cheque processing.

For one of the biggest banks in Türkiye, I led the implementation of Kofax Capture and Transformation to process approximately 5,000 EFT, remittance, and arbitration commission documents daily. I designed and implemented automated classification, separation, and extraction solutions, integrating them into the bank's business applications.

11.2011 – 03.2013:

Birikim Otomasyon Sistemleri, Istanbul, Türkiye

- **Assistant System Administrator & Service Bureau Operations Manager**

  I managed the data entry staff and ensured quality control in service bureau operations. My responsibilities included troubleshooting program errors using MSSQL and OS-level solutions, generating scheduled performance reports, optimizing workflows to enhance operational efficiency, and maintaining document scanners and workstations.

Educational Background

2018 – 2020   Master of Applied Computer Science, Kristiania University College, Oslo, Norway (Masters)

Master Thesis: I developed an educational virtual reality application to measure student motivation and cybersickness. My main objective was to design an application that the students can enjoy, use easily and comfortably while keeping the development process of the VR software rapid and economical.

Courses: Big Data, IoT, Mobile Computing, Systems Development, Visual Analytics, Integration Oriented Architecture, Consulting and Leadership.

2012 – 2016   Business Administration, Eskisehir Anadolu University, Eskisehir, Türkiye (Bachelor's Degree)

2009 – 2012   Computer Programming, Kocaeli University, Kocaeli, Türkiye (Associate's Degree)
